

Pima County Health Department

Consumer Health and Food Safety Program

Consumer Health and Food Safety Inspectors (Sanitarians)

investigate complaints concerning food service establishments, swimming pools, and housing; provide food services certification and pool certification classes; and conduct vector and mosquito control activities.

Inspectors are trained to:

- ♦ Introduce themselves to the facility manager or representative upon entering for inspection.
- ♦ Present their County issued photo ID.
- ♦ Document the facility's compliance and discuss findings and any corrective action.
- ♦ If immediate action is required, the inspector will document the exact action to be taken while on site using official Pima County Health Department forms.
- ♦ A majority of inspections are conducted without advance notice; however, occasionally a follow-up inspection may need to be arranged.

As public health partners, we welcome questions from our stakeholders should you have concerns or questions on any part of the inspection process.

Please call (520) 243-7908 and you will be connected with a staff person to discuss your questions or concerns with and be provided with information regarding inspectors and the process.

If you have questions about an inspector or to verify them as an official representative of Pima County Health Department, please call (520) 243-7908.
